# SAFETY DATA SHEET

Version 1.0

# Sikadur<sup>®</sup>-20 Crack Seal Part B

	SDS Number: 10000023500 Nevision Date: 20.
General advice	: Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.
If inhaled	: Move to fresh air. Consult a physician after significant exposure.
In case of skin contact	: Take off contaminated clothing and shoes immediately. Wash off with soap and plenty of water. Immediate medical treatment is necessary as untreated wounds from corrosion of the skin heal slowly and with difficulty.
In case of eye contact	<ul> <li>Small amounts splashed into eyes can cause irreversible tissue damage and blindness.</li> <li>In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.</li> <li>Continue rinsing eyes during transport to hospital.</li> <li>Remove contact lenses.</li> <li>Keep eye wide open while rinsing.</li> </ul>
If swallowed	<ul> <li>Clean mouth with water and drink afterwards plenty of water. Do NOT induce vomiting. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. Take victim immediately to hospital.</li> </ul>
Most important symptoms and effects, both acute and delayed	<ul> <li>Health injuries may be delayed. Risk of serious damage to the lungs (by aspiration). corrosive effects sensitising effects Aspiration may cause pulmonary oedema and pneumonitis. Gastrointestinal discomfort Allergic reactions Dermatitis See Section 11 for more detailed information on health effects and symptoms. Harmful if swallowed. May be fatal if swallowed and enters airways. May cause an allergic skin reaction. Causes serious eye damage. Suspected of causing cancer. Causes severe burns.</li> </ul>
Notes to physician	: Treat symptomatically.

## **SECTION 5: Firefighting measures**

Extinguishing media Suitable extinguishing media	: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Physicochemical hazards ar	ising from the chemical
Specific hazards during	: Do not allow run-off from fire fighting to enter drains or water

firefighting	courses.	
Hazardous combustion products	: No hazardous combustion products are k	nown
Special protective equipmen	t and precautions for fire-fighters	
Special protective equipment for firefighters	: In the event of fire, wear self-contained b	reathing apparatus.
Specific extinguishing methods	: Collect contaminated fire extinguishing w must not be discharged into drains. Fire residues and contaminated fire extin be disposed of in accordance with local re	guishing water must

#### **SECTION 6: Accidental release measures**

Personal precautions, protective equipment and emergency procedures	: Use personal protective equipment. Deny access to unprotected persons.	
Environmental precautions	: Do not flush into surface water or sanitary sewer system. If the product contaminates rivers and lakes or drains inform respective authorities.	
Methods and materials for containment and cleaning up	: Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Keep in suitable, closed containers for disposal.	

# SECTION 7: Handling and storage

# Handling

## Precautions for safe handling

Advice on protection against fire and explosion	: Normal measures for preventive fire protection.
Advice on safe handling	<ul> <li>Do not breathe vapours or spray mist. Avoid exceeding the given occupational exposure limits (see section 8). Do not get in eyes, on skin, or on clothing. For personal protection see section 8. Persons with a history of skin sensitisation problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. Smoking, eating and drinking should be prohibited in the application area. Follow standard hygiene measures when handling chemical products</li> </ul>

#### Storage

#### Conditions for safe storage, including any incompatibilities

Conditions for safe storage

Store in original container. Keep container tightly closed in a dry and well-ventilated place.
Containers which are opened must be carefully resealed and kept upright to prevent leakage.
Observe label precautions.
Store in accordance with local regulations.

#### SECTION 8: Exposure controls and personal protection

Respiratory protection	ventilation is that exposu The filter cla maximum e (gas/vapou handling the	: Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self- contained breathing apparatus must be used.		
Hygiene measures	<ul> <li>Handle in accordance with good industrial hygiene and safety practice.</li> <li>When using do not eat or drink.</li> <li>When using do not smoke.</li> <li>Wash hands before breaks and at the end of workday.</li> </ul>

Version 1.0

#### Skin corrosion/irritation

Causes severe burns.

#### Serious eye damage/eye irritation

Causes serious eye damage.

#### Respiratory or skin sensitisation

Skin sensitisation: May cause an allergic skin reaction. Respiratory sensitisation: Not classified based on available information.

#### Germ cell mutagenicity

Not classified based on available information.

#### Carcinogenicity

Suspected of causing cancer.

#### **Reproductive toxicity**

Not classified based on available information.

#### STOT - single exposure

Not classified based on available information.

#### STOT - repeated exposure

Not classified based on available information.

#### Aspiration toxicity

May be fatal if swallowed and enters airways.
