## **SECTION 8: Exposure controls and personal protection**

<b>Control parameters</b> Contains no substances with occupational exposure limit values.			
Individual protection measu	res,	such as personal protective equipment	
Eye/face protection	:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.	
Skin protection		Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place.	
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.	
Respiratory protection	:	Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self- contained breathing apparatus must be used.	
Hygiene measures	:	When using do not eat or drink. When using do not smoke.
